CAREER SUMMARY

Recent Computer Science graduate from Virtual University, enthusiastic about entering the IT industry. I'm a **MERN Stack & WordPress Developer**, skilled in building dynamic web applications and customized websites. Looking for an **internship** or entry-level role with **minimal pay** to gain hands-on experience and grow my expertise."

EDUCATION

March 2021 - March 2025
Lahore

Virtual University of Pakistan

Bachelor of Computer Science

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, C/ C++, PHP, React.js, Express.js, Node.js
- **Web Technologies:** Amazon (AWS), Cloudinary, Render, Vercel, Netlify
- **Database:** SQL Server, MySQL, MongoDB
- **Tools and IDEs:** VS Code, Visual Studio, Dreamweaver, Postman

PROFESSIONAL EXPERIENCE

Certification: MERN Stack Developer / Nexskill Institute

Nov 2024 - Mar 2025

- Successfully completed a comprehensive MERN stack development certification, covering MongoDB, Express.js, React, and Node.js.
- Built a dynamic MERN stack project, integrating RESTful APIs, user authentication, and state management to deliver a seamless user experience.
- Gained hands-on experience in building full-stack web applications and deploying scalable solutions.

PHP Developer Intern / Minhaj Internet Bureau

Feb 2024 - Nov 2024

- Developed and maintained dynamic web applications using PHP, enhancing user experience and improving website functionality.
Debugged and optimized existing PHP code, resolving technical issues and improving system performance.
- Created and integrated responsive web pages, ensuring cross-browser compatibility and mobile responsiveness

PROJECTS

My-Restaurant (MERN STACK Food Delivery Web App) [Website Link](#) [GitHub Link](#)

- Developed and deployed a full-stack Food Delivery web app using the **MERN stack**, featuring fast food ordering, **Add to Cart** functionality, real-time **order** tracking, **JWT** authentication, **Stripe payment integration**, and a responsive, dynamic UI.
- Built secure APIs with **Express** and **Node.js**, implemented **advanced search** functionality, dynamic cart management, and **deployed** the project on **Render** with clean, scalable code managed via **GitHub**.

E-Commerce Website (MERN STACK)

- Developed a full-stack E-Commerce website using the **MERN stack (MongoDB, Express.js, React, Node.js)** with product listing, cart management, order placement and **JWT authentication** functionalities.
- Integrated **Stripe payment gateway** for secure online transactions, developed robust product management with **Cloudinary** image uploading and **AWS** integration, and implemented **AWS SES for email verification**, ensuring a seamless and secure eCommerce user experience.

Real-Time Chat Application (MERN SOCKET.IO) [GitHub Link](#)

- Developed a real-time chat application using the **MERN stack** and **Socket.IO**, enabling multiple users to join chat rooms and exchange messages via **bi-directional WebSocket** communication.
- Designed a responsive UI with **React.js**, managed real-time data flow with **Node.js/Express.js**, and used **MongoDB** for storing users and chat history, ensuring **performance** and **scalability**.

Online Store Web App (MERN STACK)

- Built a store with **JWT authentication**, **Cloudinary** image uploads, and a dynamic cart system.
- Stored user, products and cart data in **MongoDB**, integrated **Stripe** for payments, and added admin features to **add, update, and delete** products.

E-Recruitment System (PHP)

- Developed a robust E-Recruitment System using **php**, enabling seamless **job posting, application**, and user management for candidates, recruiters, and admins.
